This unit is designed to operate with a working environment between 5 C and 35 C.If the unit has been switched off and needs to be switched on again quickly, allow approximatelythree minutes for the correct operation to resume.Do not connect the dehumidifier to a multiple socket outlet, which is also being used for other electrical appliances.Select a suitable location, making sure you have easy access to an electrical outlet.Plug the unit into a 115V~ 60Hz electrical socket-outlet with earth connection.Make sure the Water bucket is correctly fitted otherwise the unit will not operate properly.Page 2 7 OPERATING THE UNIT Removing the collected water 1. Pull out the bucket a little. 2. Hold both sides of the bucket with even strength, and pull itout from the unit. 3. Pour the water out. There are two ways to remove collected water.1. Use the bucket When the bucket is full, the unit will automatically stop running, and the Full indicator light will flash.Slowly pull out the bucket. Grip the left and right handlessecurely, and carefully pull out straight so water doesnot spill. Do not put the tank on the floor because thebottom of the bucket is uneven. Otherwise the bucketwill fall and cause the water to spill.Throw away the water and replace the bucket. ThePage 3 Grip the tab on the filter and pull it out as shownin Fig.A.Clean the filter with warm, soapy water. Rinse andlet the filter dry before replacing it. Do not clean thefilter in a dishwasher. Insert the air filter into the unit from the side and pushit in. See Fig.C DO NOT operate the dehumidifier without a filterbecause dirt and lint will clog it and reduceperformance. NOTE: DO NOT RINSE OR PUT THE FILTERIN AN AUTOMATIC DISHWASHER. To remove: To attach: CAUTION: Fig. A Fig. B Fig. C After turning off the unit, wait one day beforeemptying the tank.Clean the main unit, bucket and air filter.Twist the excess cord onto the power cord hook.Cover the unit with a plastic bag.Store the unit upright in a dry, well-ventilated place. 4. When not using the unit for long time periods CARE AND MAINTENANCE Care and cleaning of the dehumidifier Turn the dehumidifier off and remove the plug from the wall outlet before cleaning. 1. Clean the Grille and Case Use water and a mild detergent. Do not use bleachor abrasives.Do not splash water directly onto the main unit. Doingso may cause an electrical shock, cause the insulationto deteriorate, or cause the unit to rust.The air intake and outlet grilles get soiled easily, so usea vacuum attachment or brush to clean. 2. Clean the bucket Every few weeks, clean the bucket to prevent growth of mold,mildew and bacteria. Partially fill the bucket with clean waterand add a little mild detergent. Swish it around in the bucket,empty and rinse. Do not use a dishwasher to clean the bucket. After clean, the bucket must be in place and securelyseated for the dehumidifier to operate. You may be injured if you fall or if the unit falls over. Do not place flower vases or other water container on top of the unit. Water may spill inside the unit, causing insulation failure and electrical shock or fire. Do not, under any circumstances, cut, remove, or bypass the grounding prong. This unit is grounded through the power cord plug when plugged into a matching wall outlet. Electrical Information The manufactures nameplate is located on the rear panel of the unit and contains electrical and other technical data specific to this unit. Be sure the air conditioner is properly grounded. To minimize shock and fire hazards, proper grounding is important. The power cord is equipped with a three-prong grounding plug for protection against shock hazards. Your air conditioner must be used in a properly grounded wall receptacle. If the wall receptacle you intend to use is not adequately grounded or protected by a time delay fuse or circuit breaker, have a qualified electrician install the proper receptacle. Ensure the receptacle is accessible after the unit installation. Do not use extension cords or an adapter plugs with this unit. However, if it is necessary to use an extension cord, use an approved air conditioner extension cord only (available at most local hardware stores). To avoid the possibility of personal injury, always disconnect the power supply to the unit, before installing and/or servicing.
